

ALI OMAR AHMED BAMAGA

ARTIFICIAL INTELLIGENCE

Saudi Arabia, Jeddah 24242, | aliobamaga2003@gmail.com | Phone:+966591463254 | [linkedin](#)

SUMMARY

Highly motivated and distinguished Senior Artificial Intelligence student at the University of Bisha, recognized for academic excellence and strong analytical skills. Passionate about AI, programming, and data-driven technologies, with a proven ability to grasp complex concepts quickly and apply them in practical projects. Committed to continuous learning, hands-on experimentation, and research, eager to contribute innovative solutions that have a meaningful impact in the AI field.

PROFESSIONAL EXPERIENCE

Internship, KAU,deanship of e learning and distance education Jun 2025 - Aug 2025

- Learned the fundamentals of e-learning and distance learning systems.
- Gained knowledge of how e-learning systems are integrated with university platforms.
- Learned the basics of system requirement analysis and release updates.
- Understood the principles of system interface design and testing.
- Learned how system components are updated and integrated with databases.
- Gained an understanding of system testing processes and server deployment basics

CERTIFICATES

- KAU,deanship of e learning and distance education (Completed during internship).**

 - Introduction to Virtual Reality (VR) application design using Unity 3D and Meta Quest.
 - Basic knowledge of Meta XR SDK and immersive learning environments.
 - Introduction to data analysis and visualization using Microsoft Power BI.
 - Learned fundamentals of DAX and AI features in Power BI
- IBM Skillsbuild Guided Learning Experience - Using Generative AI for Software Development.**

 - Learned to apply generative AI techniques for software development, including code generation, optimization, and using AI-driven tools for programming tasks.

PROJECTS

Graduation Project

- An Intelligent Video-Based Violence Detection System Using Hybrid Deep Learning AlgorithmsAutomotive Technology.

Academic Projects

- American Sign Language "ASL" DETECTION BY ML: American Sign Language detection using ML means recognizing hand signs and converting them into text or speech. Machine learning Course.
- BERT-Based Disease Prediction with NLP: BERT-based disease prediction uses NLP to analyze symptoms and predict possible diseases from text input. Natural Language Processing Course.
- Data processing in Data Structures

SKILLS

Technical Skills	Soft Skills	
• Artificial Intelligence (AI) • Python (Programming Language) • Data Analysis • Data structures and algorithms • Machine Learning	-Communication. -Teamwork. -Problem Solving. -Time Management.	-Adaptability. -Critical Thinking. -Attention to Detail. -Work Ethic.

EDUCATION

- Feb 2022 - Jan 2026 Artificial Intelligence, Universty of Bisha , (Finished Credit Hours Program)

ADDITIONAL INFORMATION

Languages:

- Arabic Native Speaker
- English Fluent
